SUPER
LURES**

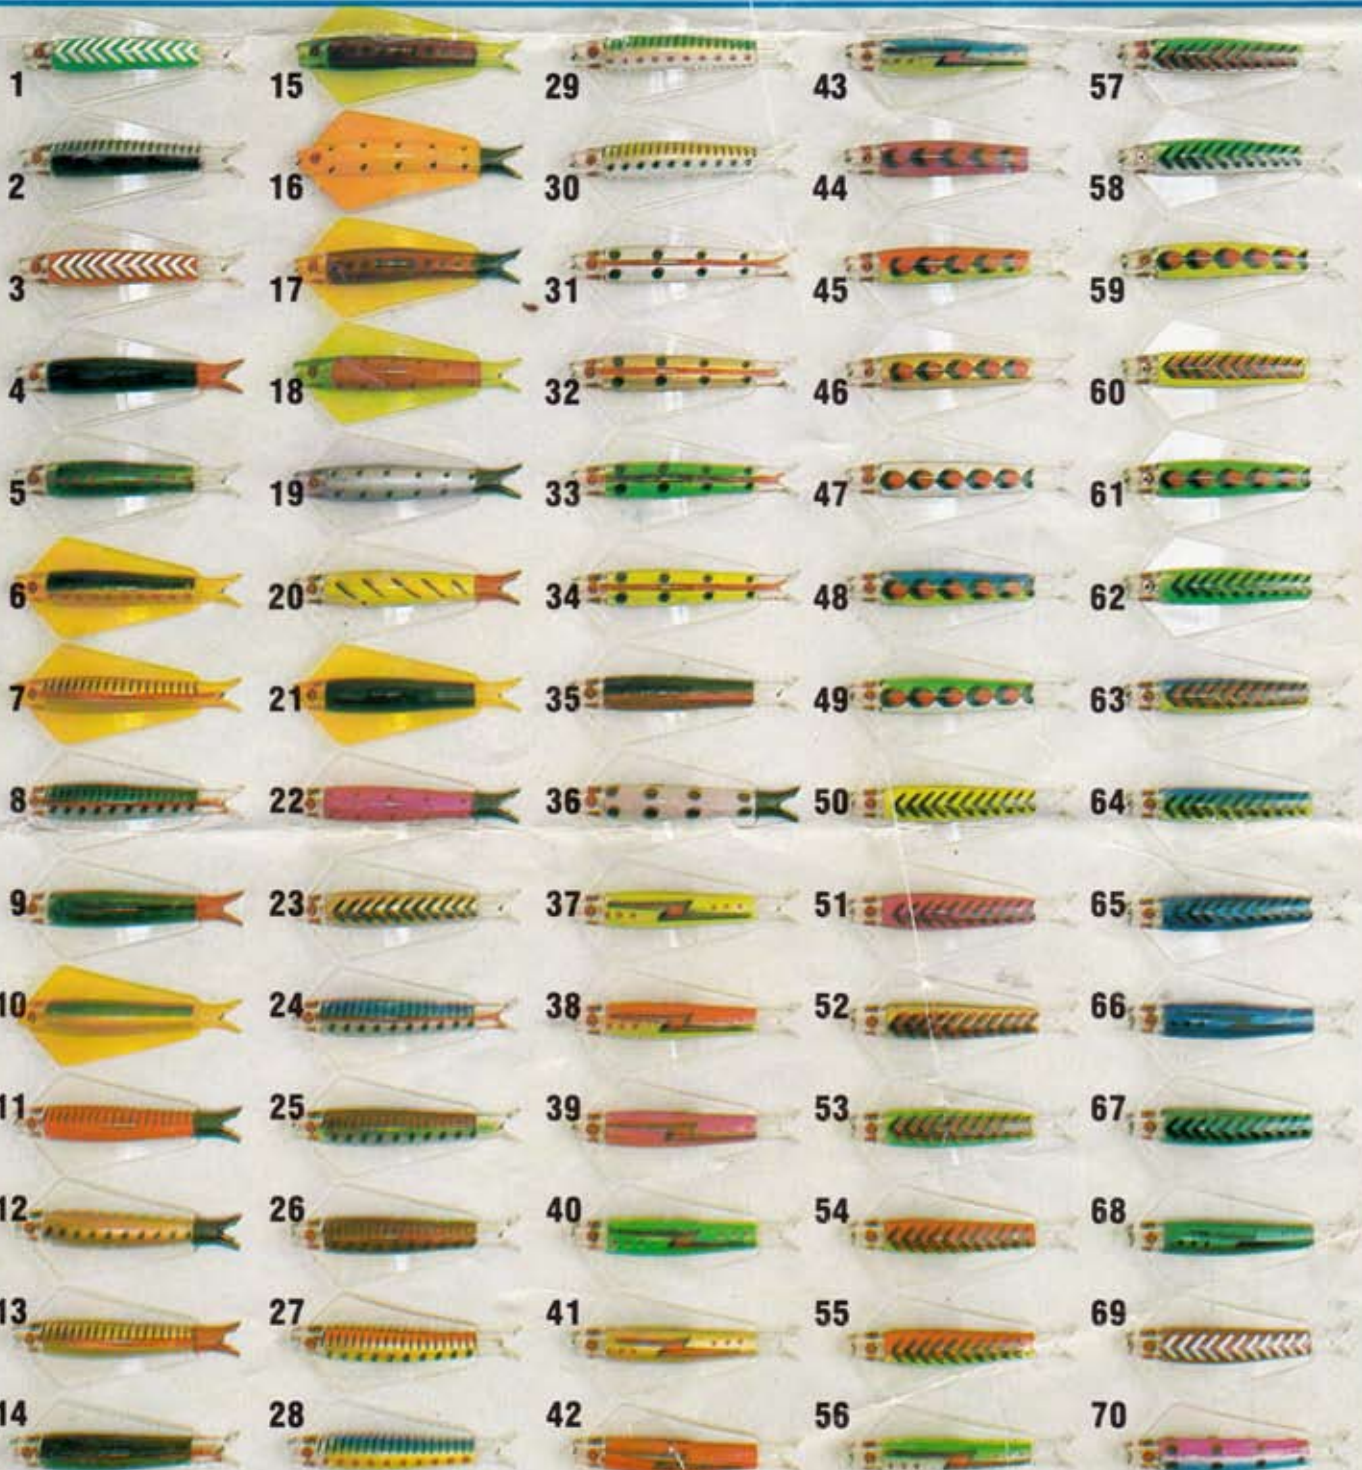

SUPER KOBRA

With its life-like swimming action the Super Kobra is an ideal Trolling Lure. It can also be used for offshore fishing. Super Kobra is available in sizes 2³/₈" x 12g. and 1¹/₂" x 6g. and comes in a range of 70 colours all proven fish catchers.

The Lure Which Won a Wager

A Taupo Fishing Guide claimed he could catch at least a trout a day for a year . . . the wager was on — During 366 days of fishing, Keith Wood justified his boast. he caught 98% of his trout on Johnson's Fish Tailed Kobra. Not to be confused with similar lures, it can easily be identified by its distinctive forked fish tail.

If the trout have been eluding you, ask your sports dealer to show you the range.

Super Spinners

For years one of the most popular artificial lures used throughout Australia. Available in sizes 2" x 10g, 1½" x 6½g, 1⅛" x 4½g. Super Spinners are available in the same colour range as Super Kobras.

Super Wobblers

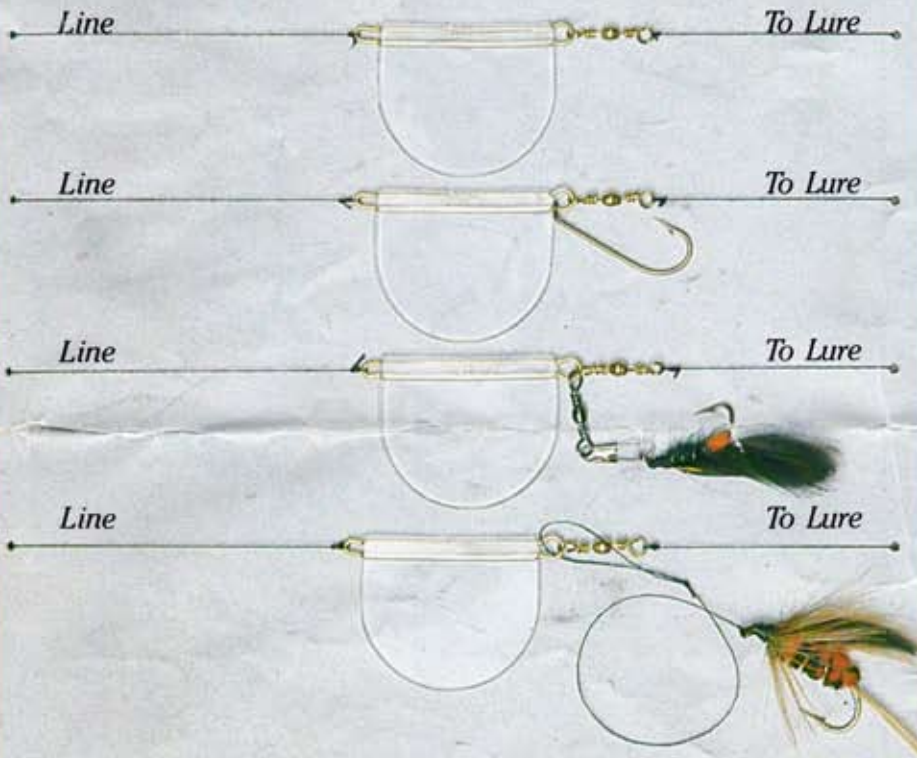

A minnow shaped wobbler weighing 8g with a good swimming action, Super Wobblers are good fish catchers either trolling or off shore fishing. Super Wobblers are available in most colours in the Super Kobra range.

Super Specials

This lure with its wriggling action and weighing only 7g is ideal for off shore fishing in shallow water. Super Specials are available in the same colour range as Super Kobras.

Super Anti-Kinks

Newly designed anti-kinks with a removeable wire. Not only stops your line from twisting, they are also suitable for:

- (A) Clipping on a small hook.
- (B) Clipping on a fly dropper direct.
- (C) Using a fly dropper on a short trace.
